

Love's Web Firm

Web: Ultimate (CRM)

When you are running a large scale company, it is highly recommended to utilize some type of CRM portal to help manage different aspects of your business. From Call-Centers to HR Portal Directories, and much more. Love's Web Firm provides you with the ability to have your own In-House Web-Based Application!

How does our process work?

Rather easily!

We grab an understanding of the software you are wanting, or are using, and then our team of programmers will start to develop a replica of the software, or generate a customized one just for you!

What languages do we use?

We have the ability to utilize Ruby on Rails or PHP, based upon your needs and demands. However, we prefer to use Ruby on Rails as much as possible.

Will My CRM Be Mine?

Yes! When we build a CRM based on your needs and desires, it is yours! You can do with it as you please!

Can My I.T. Team Make Alterations After Completed?

Of Course! We will be able to provide you and your I.T. staff a link to our GitHub repository that is hosting your websites code!
